Michael,

The two shortened links I mentioned below are now up and running.

Please let me know if you want to discuss any of my suggestions on the PEI resource descriptions. Hope the suggested tweaks are helpful! And thanks again for including us.

Best,

Rick Long

Hi Michael,

Good to talk with you this morning. In the attached document I've noted a few suggestions/corrections on the description of PEI's resources. To make it a little easier on you, those changes are highlighted **IN RED**. A few quick comments:

1. To make it easier on users of your site, we have provided shortened links for both the UST Component Compatibility Library and the State Survey on UL 971. Those links will be active bright and early on Monday morning (if you are posting today, you would still have to use the longer links—but I'm assuming that's not the case).
2. Because PEI is still soliciting manufacturers to submit statements for the UST Component Compatibility Library, I have also added a short statement on how they can do so.

Hope this is helpful. Please let me know if you would like to discuss any of the suggestions—or if I can provide any further assistance now or in the future.

PEI appreciates very much being included on your site. This should be a very helpful resource to the community.

Best regards,

Rick

Rick--

I work with Andrea Barbery in EPA's UST program on compatibility issues, and want to thank you for your effort last year in reaching out to PEI members to collect manufacturer certifications associated with EPA's June 2011 biofuels guidance. Your Biofuels Compatibility Library is definitely a resource that owners and operators of USTs can use to demonstrate compatibility. As we update our Web site, we would like to include a link that goes directly to the Compatibility Library.

To that end, we've put together a table that points users to various websites from which they might find UL listing information or equipment manufacturer certifications for their UST equipment. The attached document also includes a short description of each of the four websites we link to. Please review the description of your Web site that is included in the attachment. Let me know of any comments or concerns with the description and observations about the document as a whole by Wednesday, August 15.

Thank you in advance for your consideration.
